BEFORE THE BOARD OF PATENT APPEALS
AND INTERFERENCES.

Ex parte SCOTT GRAHAM

Appeal No. 2005-1142
Application No. 09/524,612

ON BRIEF

Before GARRIS, WALTZ, and DELMENDO, Administrative Patent Judges.

DELMENDO, Administrative Patent Judge.

DECISION ON APPEAL

This is a decision on an appeal under 35 U.S.C. § 134 (2004) from the examiner's final rejection of claims 1 through 9, 16, and 17 (final Office action mailed on June 19, 2003) in the above-identified application.¹ Claims 10 through 15, the

¹ In reply to the final Office action, the appellant submitted an amendment pursuant to 37 CFR § 1.116 (2003) (effective Feb. 5, 2001) on September 10, 2003, proposing changes to all of the appealed claims. The examiner indicated in the advisory action of September 24, 2003 that the amendment will not be entered for purposes of this appeal. The examiner further stated in the advisory action that the 35 U.S.C. § 112,

Appeal No. 2005-1142
Application No. 09/524,612

only other pending claims, stand withdrawn from further consideration pursuant to 37 CFR § 1.142(b)(2003)(effective Dec. 22, 1959) as being directed to a non-elected invention. (Answer at 2.)

The subject matter on appeal relates to a mitt removably associated with a vehicle washing brush (claims 1-8), a self-service vehicle wash (claim 9), and to a foaming brush mounted to a self-service car wash (claims 16 and 17). According to the appellant, the present invention is more effective in removing dirty film than an uncovered bristle brush used in the prior art and prevents scratching (of vehicle surfaces) associated with the use of such prior art bristle brush. (Specification at 1-2.) Further details of this appealed subject matter are recited in representative claims 1 and 17 reproduced below:

1. A mitt removably associated with a vehicle washing brush comprising:
a material formed into the approximate shape of said washing brush, wherein said material is capable of fitting around said washing brush, and said material has a first surface facing and in contact with said washing brush, and a second surface opposite said first surface facing away from said washing brush, and wherein said second surface is woven with fibers capable of washing a surface of a vehicle, and

¶2, rejection was overcome. We note, however, that the rejection was reinstated in the examiner's answer mailed on May 18, 2004.

Appeal No. 2005-1142
Application No. 09/524,612

said material is capable of allowing the passage of water from said washing brush;

a fastener capable of securing said mitt onto said brush while water passes through said washing brush.

17. A foaming brush removably mounted to a self-service car wash comprising a cover adapted to fit over said brush.

The examiner relies on the following prior art references as evidence of unpatentability:

Peterson	2,571,606	Oct. 16, 1951
Wirth	5,177,831	Jan. 12, 1993
Inventorship Unknown (published GB application) (GB '824)	481,824	Mar. 18, 1938

The claims on appeal stand rejected as follows:

- I. claims 1 through 9, 16, and 17 under 35 U.S.C. § 112, ¶2, as indefinite (answer at 4-5);
- II. claims 1 through 5 and 9 under 35 U.S.C. § 102(b) as anticipated by Wirth (id. at 5-6);
- III. claims 1, 2, 6, 7, and 9 under 35 U.S.C. § 102(b) as anticipated by GB '824 (id. at 6);
- IV. claim 8 under 35 U.S.C. § 103(a) as unpatentable over GB '824 in view of Peterson (id. at 7); and
- V. claims 16 and 17 under 35 U.S.C. § 103(a) as unpatentable over Wirth (id. at 8.)

We reverse rejection I as to claims 1 through 9 and 16 and rejections II and V in their entirety. We affirm, however, rejection I as to claim 17 and rejections III and IV in their entirety.²

I. 35 U.S.C. § 112, ¶2: Claims 1-9, 16, & 17

With respect to appealed claim 1, it is the examiner's position that the term "'associated' appears vague." (Answer at 5.) That is, the examiner is uncertain as to whether "the mitt [is] coupled with the washing brush or not." (Id.) The examiner further queries: "If claim 1 is the combination, then what is claim 16 setting forth?" (Id.)

Our view of the term "associated" in the phrase "removably associated" differs from that of the examiner. The appellant argues throughout the brief that it is the combination of the mitt and the brush that is being claimed. (See, e.g., appeal brief at 5.) The appellant's argument is consistent with the common meaning of the term as would be understood by one skilled in the relevant art. Specifically, Merriam-Webster's Collegiate

² The appellant submits that claims 1-9 stand or fall together. (Appeal brief filed on February 20, 2004 at 4.) Accordingly, in our assessment of each of rejections III and IV, we confine our discussion to a single claim (i.e., claim 1 for rejection III and claim 8 for rejection IV). 37 CFR § 1.192(c) (7) (2003) (effective Apr. 21, 1995).

Appeal No. 2005-1142
Application No. 09/524,612

Dictionary 70 (10th ed., 1996), copy attached, defines the root term "associate" as: "to join or connect together: COMBINE." Under these circumstances, it cannot be said that appealed claim 1 encompasses or reads on a mitt alone because one skilled in the relevant art would understand that a mitt that is not "removably associated" with a brush would not infringe appealed claim 1. The examiner's reliance on appealed claim 16 is unpersuasive, because claim 16 is more restrictive relative to claim 1 in that it recites a "foaming brush mounted to a self-service car wash."

We reach a different conclusion with respect to appealed claim 17. The examiner asserts: "It is unclear how a brush mounted to a car wash can be comprised of a cover adapted to fit over said brush. If the cover is what constitutes the brush, how can it be adapted to fit over itself?" (Answer at 5.) The appellant, on the other hand, does not respond to the examiner's rejection on this ground. Accordingly, we summarily affirm the examiner's uncontested rejection of appealed claim 17.

II. 35 U.S.C. § 102(b): Claims 1-5 & 9 over Wirth

The examiner's rejection of appealed claims 1 through 5 and 9 is premised on the erroneous interpretation that appealed claim 1 reads on a mitt alone rather than a mitt that is

Appeal No. 2005-1142
Application No. 09/524,612

"removably associated with a vehicle washing brush." (Answer at 5.) Wirth, the relied upon reference, does not disclose a covered brush for washing vehicles. Instead, Wirth describes a cloth-covered sponge. (Column 3, lines 44-49; Figure 6.) In fact, Wirth denigrates the use of brushes for washing vehicles. (Column 1, lines 39-52.)

Because Wirth does not describe a mitt in removable association with a brush, we cannot uphold this rejection.

III. 35 U.S.C. § 102(b): Claims 1, 2, 6, 7, & 9 over GB '824

A myriad of judicial precedents repeatedly admonish the PTO to give claims their broadest reasonable interpretation, taking into account any enlightenment by way of definitions or otherwise found in the specification. In re Bigio, 381 F.3d 1320, 1324, 72 USPQ2d 1209, 1211 (Fed. Cir. 2004) ("[T]he PTO gives a disputed claim term its broadest reasonable interpretation during patent prosecution."); In re Morris, 127 F.3d 1048, 1054, 44 USPQ2d 1023, 1027 (Fed. Cir. 1997) ("[T]he PTO applies to the verbiage of the proposed claims the broadest reasonable meaning of the words in their ordinary usage as they would be understood by one of ordinary skill."); In re Zletz, 893 F.2d 319, 321-22, 13 USPQ2d 1320, 1322 (Fed. Cir.

Appeal No. 2005-1142
Application No. 09/524,612

1989) ("During patent examination the pending claims must be interpreted as broadly as their terms reasonably allow.").

Applying this legal principle, we find that the specification (page 3, lines 5-9) informs one skilled in the relevant art as follows:

The term "self-service vehicle wash" includes any vehicle washing facility where vehicles are regularly washed manually. A typical example of a self-service vehicle wash is a self-service car wash that is business [sic] that is open to the public, where patrons pay for certain amount of time to use the facilities. Self-service vehicle washes also exist at private, government or military institutions where a large number of vehicles are regularly washed.
[Underscoring added.]

Thus, the specification makes it clear to one skilled in the relevant art that the recitation "self-service vehicle wash" includes any facility where vehicles are washed on a regular basis. From this definition, we determine that the recitation "self-service vehicle wash" in appealed claim 9 reads on any facility where a vehicle could be washed.

GB '824 describes a brush or broom in combination with a mitten-shaped cover secured to the brush or broom. (Figure 6.) GB '824 further teaches that a cord or the like of an elastic or non-elastic material secured in a hem around the edge of the cover foundation may be used to affix the cover to the brush or

Appeal No. 2005-1142
Application No. 09/524,612

broom. (Page 2, line 107 to page 3, line 7.) According to GB '824, "[t]he glove, mitten or pocket forming member may if desired be made from waterproof or oilproof material" (page 2, lines 3-5; page 3, lines 81-83), thus indicating that the cover may be made from a material that is not waterproof.

We find no difference in terms of structure between the invention recited in appealed claims 1, 2, 6, and 7 and the covered brush or broom described in GB '824. Given this structural identity, it would reasonably appear that the covered brush or broom of GB '824 would inherently or necessarily be capable of being useful for washing vehicles. In re Schreiber, 128 F.3d 1473, 1477, 44 USPQ2d 1429, 1431 (Fed. Cir. 1997). In fact, the appellant admits as much. (Appeal brief at 5.)

With respect to appealed claim 9, we have already determined that the recitation "self-service vehicle wash" in appealed claim 9 reads on any facility where a vehicle could be washed. It is our judgment that GB '824 discloses the same, because one of ordinary skill in the art would have been in possession of the combination of the covered brush as described in GB '824 with a bucket of water. In re Graves, 69 F.3d 1147, 1151, 36 USPQ2d 1697, 1701 (Fed. Cir. 1995); In re Donohue, 766

Appeal No. 2005-1142
Application No. 09/524,612

F.2d 531, 533, 226 USPQ 619, 621 (Fed. Cir. 1985); In re LeGrice, 301 F.2d 929, 936, 133 USPQ 365, 373-74 (CCPA 1962).

For these reasons, we are in complete agreement with the examiner that GB '824 describes, either expressly or inherently, every limitation recited in appealed claims 1, 2, 6, 7, and 9 within the meaning of 35 U.S.C. § 102.

IV. 35 U.S.C. § 103(a): Claim 8 over GB '824 and Peterson

The examiner determined (answer at 7):

It would have been obvious to one of [ordinary] skill in the art to provide the elastic for the cover of the GB patent in the form of an elastic sheet sewn about the opening, instead of elastic cording sewn into the hem, as clearly disclosed by Peterson, as an art recognized equivalent elastic means.

In response, the appellant argues that "[n]owhere does Peterson teach or suggest to employ a cover to a vehicle wash brush, and Peterson does not mention vehicles whatsoever."
(Appeal brief at 6.)

We do not find the appellant's argument persuasive. As the examiner notes (answer at 11), Peterson is cited for its teaching of a sewn elastic band for securing one object to another. Thus, one of ordinary skill in the art would have found it prima facie obvious to use the securing means described in Peterson in lieu of the one described in GB '824 with the

Appeal No. 2005-1142
Application No. 09/524,612

reasonable expectation that these means would be interchangeable fastening or securing means. In re Keller, 642 F.2d 413, 426, 208 USPQ 871, 882 (CCPA 1981) ("[O]ne cannot show non-obviousness by attacking references individually where, as here, the rejections are based on combinations of references.").

V. 35 U.S.C. § 103(a): Claims 16 & 17 over Wirth

The examiner alleges: "While Wirth does not disclose his cover as being fit over a brush, such appears obvious in view of the teachings of Wirth." (Answer at 8.) The examiner concludes: "Merely providing the mitt of Wirth on a brush instead of a sponge appears obvious to one of skill in the art to provide a softer surface for vehicle cleansing." (Id.)

The examiner's position is not well taken. First, "appears obvious" is not the standard to be applied in determining obviousness under 35 U.S.C. § 103(a). In re Vaeck, 947 F.2d 488, 493, 20 USPQ2d 1438, 1442 (Fed. Cir. 1991) (citing In re Dow Chemical Co., 837 F.2d 469, 473, 5 USPQ2d 1529, 1531 (Fed. Cir. 1988)). Second, the examiner provides no reasoning based on facts to arrive at the obviousness conclusion.

For these reasons, we cannot affirm this rejection.

Appeal No. 2005-1142
Application No. 09/524,612

Summary

In summary, we reverse: (i) the rejection under 35 U.S.C. § 112, ¶2, of appealed claims 1 through 9 and 16; (ii) the rejection under 35 U.S.C. § 102(b) of appealed claims 1 through 5 and 9 as anticipated by Wirth; and (iii) the rejection under 35 U.S.C. § 103(a) of appealed claims 16 and 17 as unpatentable over Wirth. However, we affirm: (i) the rejection under 35 U.S.C. § 112, ¶2, of appealed claim 17; (ii) the rejection under 35 U.S.C. § 102(b) of appealed claims 1, 2, 6, 7, and 9 as anticipated by GB '824; and (iii) the rejection under 35 U.S.C. § 103(a) of appealed claim 8 as unpatentable over GB '824 in view of Peterson.

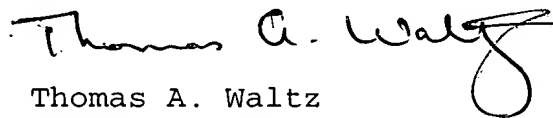

The decision of the examiner is therefore affirmed in part.

Appeal No. 2005-1142
Application No. 09/524,612

No time period for taking any subsequent action in
connection with this appeal may be extended under 37 CFR
§ 1.136(a)(1)(iv).
